

Reindeer Moss

Explore

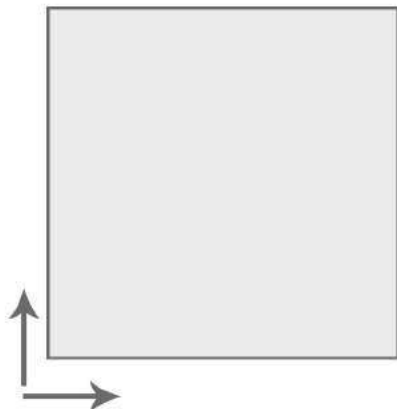

the world of preserved nature

1. Choose product

We are able to provide custom-made products to suit all your needs. Reindeer moss is available in 6 different colours and on 3 different supports. This color combination is versatile enough to be used in a variety of design projects. It is possible to match two or more colors at a time.

2. Measurements

Take all the measures of the wall that you want to cover with moss: wall width and height

Note: Moss Trend's panels have a standard size of:
60 cm x 40 cm

3. Installation

Moss Trend's interior wall finishes are suitable for most building applications as an internal decor element in either horizontal or vertical applications. Thanks to specially designed light support, the assembly of the moss panels is very simple. Panels structure allow for easy wall mounting using one of the following methods:

Before fixing the panel to the structure, apply silicon adhesive on the back of the panel, then fix it to the wall according to the project.

Use adequate screws for fixing the panels. The screws must be suitable for the corresponding wall structure.

Note:

Precise positioning of the edge panel will help to avoid misalignment of all the panels in a row. If panels need to be cut use a box cutter. After completion of assembly manually remove all dirt and dust with cotton cloth or sponge.

4. Packaging and transport

Reindeer moss panels are delivered on load-carrying wooden pallets.

Basic features of panel package:

Package dimension (can fit 4 panels):

60 cm x 40 cm | 0,96 m²

Package weight: around 6kg

Pallet dimension:

120 cm x 80 cm x 200 cm | 38,5 m²

The minimum delivery time is 7 days

5. Specification and precaution

In order for the panels to maintain their original look for many years please avoid:

- exposure to sunlight or sources of heat (e.g. radiators)
- contact with water, alcohol and irritant substances
- room humidity below 50%
